- Flexbox
- Passport.js
- bcrypt
- Git/Github
- MongoDB
- Meteor
- Bootstrap
- Ionic
- Firebase/Heroku
- Pivotal Tracker
- Agile Development
- SQL

Projects

CO Summit | Node.js/psql/Handlebars/CSS3/OAuth/Bootstrap/Knex.js

Designed to allow users to determine which Colorado ski resorts best fits their vacation desires. Using a rating system, this app returns a list of resorts best suited to the user's preferences.

Farm Share | AngularJS/Meteor/Mongodb/CSS3/Bootstrap/CSS3

Connects users with local farmers to help them find fresh local food. Customers can create a profile and search for farmers in their area and farmers can create a store to advertise their products.

iVolunteer | Node.js/j/Handlebars/jQuery/CSS3/Bootstrap/Passport.js

Allows users to find and register for local volunteer events. This app also allows for organizations to build profiles and post upcoming volunteer opportunities and reach out to potential volunteers.

Mad Lyrics | JavaScript/jQuery/HTML5/CSS3/AJAX

Mad libs for the user's favorite song lyrics. Users can search for lyrics then choose their own words and this app will swap out the original lyrics for the user inputs based on their part of speech.
